“Open access articles are freely available to read, download and share”

By "open access" to this literature, we mean its free availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself. The only constraint on reproduction and distribution, and the only role for copyright in this domain, should be to give authors control over the integrity of their work and the right to be properly acknowledged and cited. **BOAI** 

Wiley supports two different types of Open Access, green and gold

Gold Open Access

Wiley Open Access

Fully open access journals, where every article published is OA

Wiley OnlineOpen

A hybrid model enabling authors to make their article open access in one of our subscription journals

Green Open Access

Self-Archiving

Allows peer reviewed (but not final) versions of a paper to be hosted on a personal website, or an institutional website after an embargo period

1,370+ hybrid journals
with over 10,000 open
access papers published
in 2017

Discoverability

Clear indication of open access status, CC licence type and funder details

Funding Information

- Országos Tudományos Kutatási Alapprogramok. Grant Number: 115731

- Broader readership and increased citations
- Improve visibility and impact
- Comply with open access mandates
- Foster sharing and collaboration
- Retain copyright

**Why do Authors
choose open
access?**

Choice of
Creative Commons
Licence, allowing
authors to retain
copyright and
encourage sharing &
reuse

Authors

From grant funds

Waivers and discounts for certain countries

Funders

Provide dedicated funds for open access publishing

Payment
of open
access
fees
(APCs)

Institutions

Cover costs centrally with open access funds and/or arrangements with publishers

Societies

Discounts often available to members, and some societies will even cover cost themselves

Wiley Open Access Account

- Efficient
- Scalable
- Cost-effective

Publishing Your Article in a Fully Open Access Journal

Open Access Payments Made Easy with Your Institution or Funder

- 1 Visit www.wileyonlinelibrary.com and choose from one of Wiley's fully open access journals
- 2 During submission, select your institution from the **Funder/Institution** drop-down menu
- 3 Your institution is notified of your request and asked to approve
- 4 If your request is approved, you will receive a confirmation email. Your accepted article is then published open access under a Creative Commons license on Wiley Online Library

If your request is denied, you will receive an email asking you to pay for your APC. Paid articles are then published open access under a Creative Commons license on Wiley Online Library.

Open Access

Knowledge re-learning, comparing lesions, a learning and self-quiz take-home packet instructional methodologies with nurses

OnlineOpen

OnlineOpen is an open access option that allows you to share the final version of your article immediately on publication. Wiley has an agreement with your institution, UNIVERSITY OF BIRMINGHAM, to cover the open access article publication charges (APCs) for their affiliated authors. Visit our [Institutional & Funder Payments](#) page to find out what type of APC coverage is available from your institution.

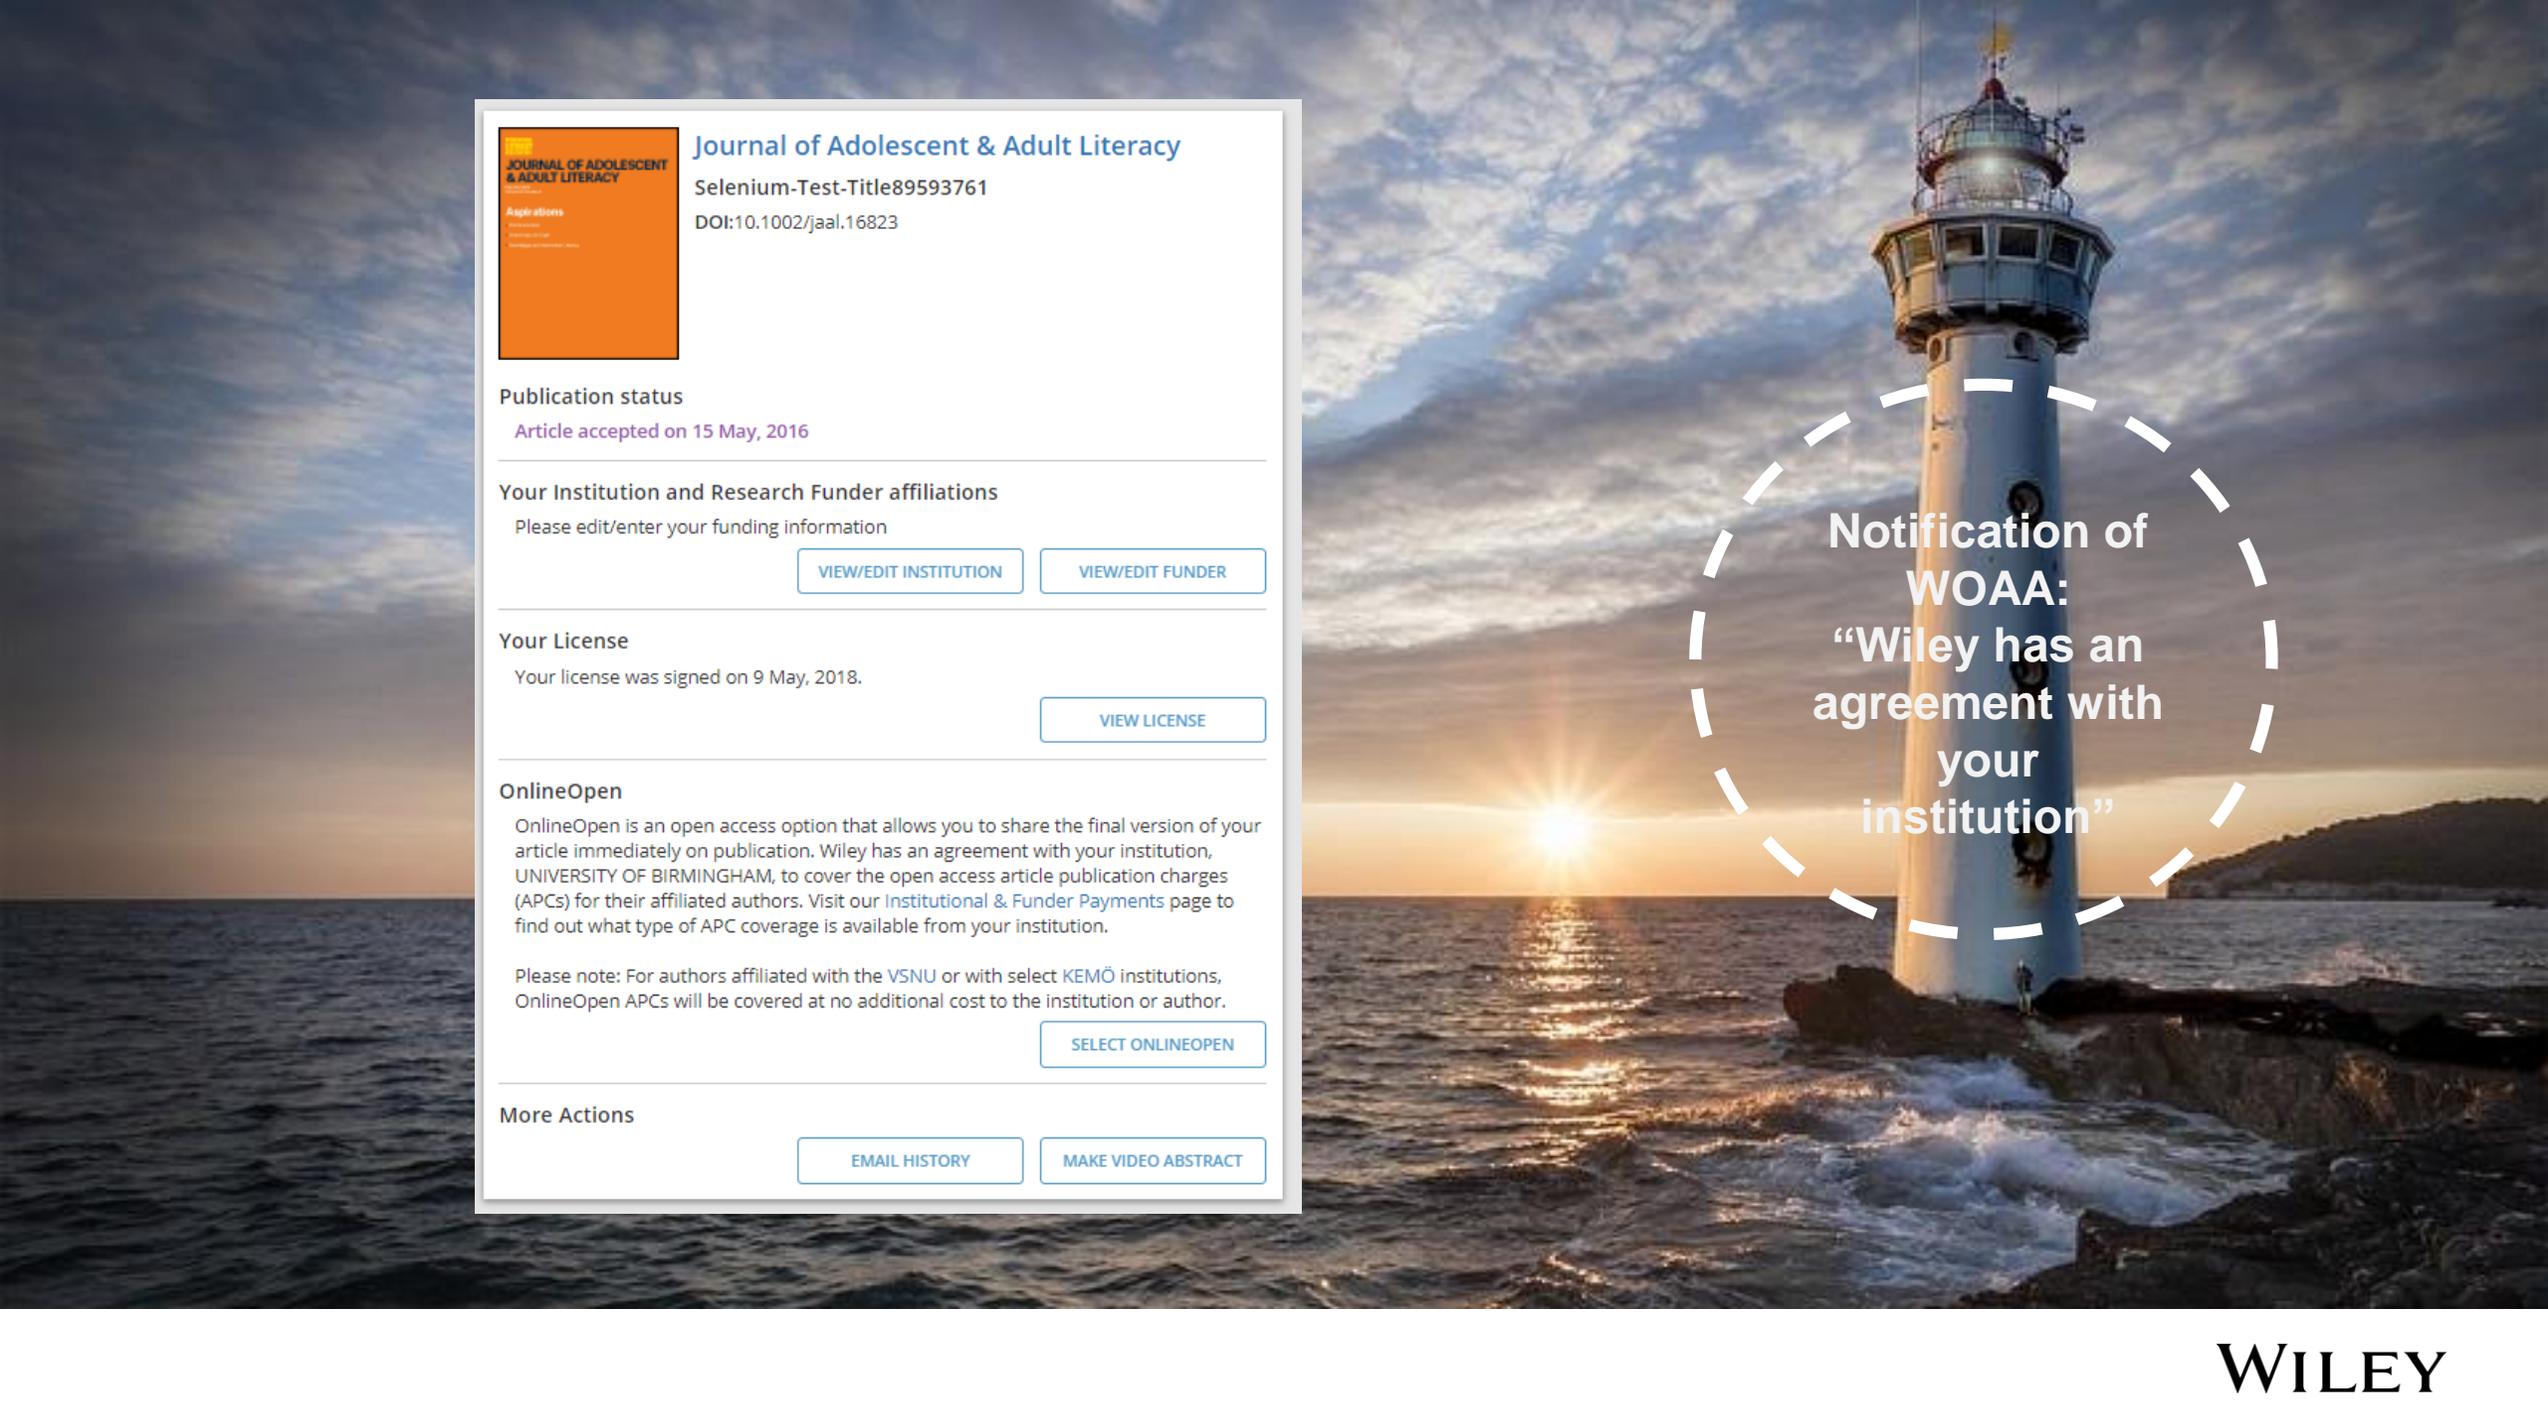

Please note: For authors affiliated with the VSNU or with select KEMÖ institutions, OnlineOpen APCs will be covered at no additional cost to the institution or author.

Open Science

Facilitating faster and more effective research discovery

At Wiley, we support the growing movement to make science more open, because this leads to a fairer, more efficient and accountable research landscape, which will ultimately drive a more effective and faster pace of discovery. We are focused on five areas of open science, working with a number of partners to offer you the best possible publishing experience.

Open Access

Increasing accessibility of publicly funded research

Open Data

Enabling reproducibility and verification of researcher data, methodology, and reporting standards

Open Standards

Embracing collaborative, interoperable, and global dissemination standards

Open Collaboration

Supporting inclusive and networked research practices

Open Recognition & Reward

Helping integrate researcher identification and evaluation tools
