World AIDS day

Learn how to optimize your use of ClinicalKey with topics aligned to health awareness days

ELSEVIER

WORLD AIDS DAY · 1 DECEMBER 2026

Did you know?

In 2025, an estimated 41.0 million people were living with HIV worldwide. 88% knew their status, 32.1 million were receiving antiretroviral therapy, and 95% of people on treatment had a suppressed viral load.

Source: WHO, HIV statistics, globally and by WHO region, July 2026 (UNAIDS 2026 estimates).
